

Colloidal Silver

High-Quality
Silver Supplement*

Colloidal Silver Supplementation

Colloidal Silver is a bioactive product containing positively charged silver particles suspended in liquid. Colloidal silver has been used homeopathically for centuries under the assumption that the nanoparticles exhibit antimicrobial properties.*^{1,2}

How Colloidal Silver Works

Colloidal silver contains nanoparticles that are larger than most molecules but small enough that they cannot be seen by the naked eye. When silver ions come into contact with moisture in the body, it is theorized that the positively charged ions are attracted to and destroy unneeded negative ions. The unique properties of colloidal silver allow it to be involved in many important biological processes.*²

Supplement Facts

Serving Size: 1 Teaspoon (5 mL)
Servings Per Container: About 23

	Amount	%DV
Silver	20 ppm	*

Other Ingredients: Deionized water

Directions: Take one teaspoon (5 mL) daily or as directed by your healthcare practitioner.

Caution: If you are pregnant, nursing, or taking medication, consult your healthcare practitioner before use. Keep out of reach of children.
